Kicking Your Kitchen Up a Notch!

All realtors agree that a good kitchen will sell a home. The days of boring Laminate Doors with Oak pulls are long gone, much to our delight!

Open concepts are the norm now as designers create a flow between the spaces most used in a home, the kitchen and living area. With the capabilities of our CNC routers and the vast array of textures and colours in our thermofoil program, you have the opportunity to create a one of a kind room that will be the envy of all the neighbours.

Consider utilizing one of our M'décor patterns for an island or backsplash in the kitchen and tying it in with custom panels on a feature wall in the living area. Choosing a **Textured Vinyl** will give a unique look that you can pair with **High Gloss Acrylic** or **Polyurethane** doors for a fantastic combination. Curved floating shelves, fluted fillers, furniture kicks and valances, are all within our mdf offerings. The thermofoil product guide on our website is an excellent resource, full of ideas and options.

Anyone who loves cooking, (or eating for that matter), will tell you that by adding some texture or spice to a recipe, you will "**Kick it up a Notch**". The same recipe concept should apply to your designs. Get your creativity flowing and give your M and J sales rep a call to discuss how to incorporate those ideas into your designs.

Imagination is everything, it is the preview of life's coming attractions.
